The Science of Psychology: An Appreciative View (King) 3rd Edition

SCIENTIFIC INQUIRY DOMAIN		
Standard Area: Perspectives in Psychological Science	Chapter 1	Summary: pp. 22 - 23
1. Development of Psychology as an Empirical Science	4 - 14	
1.1 Psychology as a discipline/goals as a science	4 - 6	
1.2 Emergence of psychology as scientific discipline	8 - 11	
1.3 Perspectives to understand behavior/mental processes	11 - 14	
1.4 Evolution of psychology as scientific discipline	8 - 14	
2. Major Subfields within Psychology	14 - 22	
2.1 Value of basic and applied psychological research with human and non-human animals		
2.2 Major subfields of psychology	14 - 21	
2.3 Important role of psychology in benefiting society and improving people's lives	21 - 22	
Standard Area: Research Methods, Measurement and Statistics	Chapter 2, 8	Summary: p. 58, p. 286 - 287
1. Research methods and measurements to study behavior/mental processes	26 - 46, 54	
1.1 Scientific method and its role in psychology	26 - 30	
1.2 Quantitative and qualitative research methods	30 - 46	
1.3 Systematic procedures to improve validity of research findings	42 - 43, 45 - 46	
1.4 Use of non-human animals in psychological research (how and why)	54	
2. Ethical Issues in Research with Human/Non-human Animals	52 - 54	
2.1 Ethical standards with human participants	52 - 54	
2.2 Ethical guidelines with non-human animals	54	
3. Basic Concepts of Data Analysis	33 - 34, 46 - 51	
3.1 Descriptive statistics	47 - 50	
3.2 Forms and use of qualitative data	46	
3.3 Correlation coefficients and their interpretation	33 - 34	
3.4 graphical representations of data in quantitative and qualitative methods	34	
3.5 Other statistical concepts such as statistical significance and effect size	50 - 51	
3.6 Validity and reliability in data analysis	29, 42, 268	
BIOPSYCHOLOGICAL DOMAIN		

Standard Area: Biological Bases of Behavior	Chapter 3, 13 Summary: pp. 99 – 100, p. 464 - 465
1. Structure and function of the nervous system in human and non-human animals	63 - 92
1.1 Major divisions/subdivisions of the human nervous system	64 - 65
1.2 The neuron and process of neural transmission	65 - 70
1.3 Central nervous system: structures and functions	70 - 90
1.4 Lateralization of brain functions	86 - 89
1.5 Mechanisms and importance of plasticity of the nervous system	63, 91 - 92
2. Structure and function of the endocrine system	90 -91
2.1 How endocrine glands are linked to the nervous system	90 - 91
2.2 Effects of hormones on behavior and mental processes	90 - 91
2.3 Effects of hormones on the immune system	
3. Interaction between biological factors and experience	76 - 78, 93 - 98, 440 - 443
3.1 Genetic transmission	93 - 96
3.2 Interactive effects of heredity and environment	96 - 98
3.3 Influence of evolved tendencies on behavior	440 - 443
4. Methods and issues related to biological advances	
4.1 Tools for studying the nervous system	76 - 78
4.2 Advances in neuroscience	
4.3 Issues related to scientific advances in neuroscience and genetics	
Standard Area: Sensation and Perception	Chapter 4 Summary: pp. 139 - 140
1. The processes of sensation and perception	104 - 115
1.1 Processes of sensation and perception and how they interact	104 - 106
1.2 Threshold and adaption	108 - 113, 115
2. Capabilities and limitations of sensory processes	105 - 106, 115 - 138
2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors	105 - 106
2.2 The visual sensory system	115 - 125
2.3 The auditory sensory system	126 - 131
2.4 Other sensory systems such as olfaction, gustation, somesthesia (skin, kinesthesia and vestibular)	131 - 138
3. Interaction of person and environment in determining perception	105 - 106, 113 - 115, 122 - 126
3.1 Gestalt principles of perception	122 - 126
3.2 Binocular and monocular depth cues	122 - 124
3.3 Importance of perceptual constancies	125 - 126
3.4 Perceptual illusions	126
3.5 The nature of attention	113 - 115

3.6 Influence of experiences and expectations on perception	105 - 106
Standard Area: Consciousness	Chapter 5 Summary: p. 178
1. The relationship between conscious and unconscious processes	144 - 150
1.1 States of consciousness	144 - 150
1.2 Conscious (explicit) and unconscious (implicit) processing	146 - 147
2. Sleep—and theories on why we sleep and dream	150 - 162
2.1 Circadian rhythm and its relation to sleep	150 - 152
2.2 The sleep cycle	153 - 158
2.3 Theories about the functions of sleep	152 - 153
2.4 Types of sleep disorders	158 - 160
2.5 Theories about the functions of dreams	160 - 162
3. Categories of psychoactive drugs and their effects	165 - 173
3.1 Major categories of psychoactive drugs and their effects	165 - 173
3.2 Actions of psychoactive drugs at the synaptic level	165 - 173
3.3 Biological and psychological effects of psychoactive drugs	165 - 173
3.4 Influence of culture and expectations on the use and experience of drugs	162 - 173
4. Other states of consciousness	172 - 178, 495
4.1 Meditation, relaxation, and their effects	176 - 178
4.2 Hypnosis and controversies over its nature and use	172 - 176
4.3 Flow states	495
DEVELOPMENT AND LEARNING DOMAIN	
Standard Area: Life Span Development	Chapter 8, 9 Summary: p. 324
1. Methods and issues in life span development	290 - 291
1.1 Interaction of environmental and biological factors in development, including the brain's role in all aspects of development	291 - 293
1.2 Issues of continuity/discontinuity and stability/change	291
1.3 Methods for studying development	291
1.4 Sensitive and critical periods in development	
1.5 End of life issues	320 - 321
2. Theories of life span development	298 - 310
2.1 Theories of cognitive development	298 - 304
2.2 Theories of moral development	310 - 311
2.3 Theories of social development	304 - 310
3. Prenatal development and the newborn	293 - 298, 304
3.1 Physical development from conception through birth, and influences on prenatal development	293 - 295
3.2 Newborn reflexes, temperament, and abilities	295 - 298, 304
4. Infancy (the first 2 years)	
4.1 Physical and motor development	295 - 298, 311 - 312

4.2 Development of infant perceptual abilities and intelligence	298 - 299, 301 - 302
4.3 Development of attachment and role of the caregiver	304 - 307, 308 - 310
4.4 Development of communication and language	280 - 284
5. Childhood	299 - 304, 307
5.1 Physical and motor development	
5.2 Development of memory and thinking ability	299 - 304
5.3 Social, cultural, and emotional development	307
6. Adolescence	310 - 315
6.1 Major physical changes	311 - 312
6.2 Development of reasoning and morality	310 - 311
6.3 Identity formation	313 - 314
6.4 Role of family and peers in adolescent development	314 - 315
7. Adulthood and aging	316 - 321
7.1 Major physical changes	316 - 318
7.2 Cognitive changes	318 - 319
7.3 Social, cultural and emotional issues in aging	319 - 321
Standard Area: Learning	Chapter 6 Summary: p. 213
1. Classical conditioning	183 - 192
1.1 Principles of classical conditioning	183 - 188
1.2 Clinical and experimental examples of classical conditioning	184, 189 - 192
1.3 Classical conditioning in everyday life	187, 189 - 192
2. Operant conditioning	192 - 206
2.1 The Law of Effect	193
2.2 Principles of operant conditioning	192 - 201
2.3 Clinical and experimental examples of operant conditioning	201 - 202
2.4 Operant conditioning in everyday life	201 - 202
3. Observational and cognitive learning	202 - 206
3.1 Principles of observational and cognitive learning	202 - 206
3.2 Observational and cognitive learning in everyday life	202 - 206, 210 - 211
Standard Area: Language Development	Chapter 3, 8 Summary: p. 99, pp. 286 - 287
1. Structural features of language	277 - 279
1.1 The structure and function of language	277 - 279
1.2 The relationship between language and thought	278 - 279
2. Theories and development stages of language acquisition	280 - 284
2.1 The process of language acquisition	280 - 284
2.2 Effects of second language acquisition on language development and other cognitive processes	283 - 284
2.3 Theories of language acquisition	280 - 282
3. Language and the brain	87 - 87, 280
3.1 Brain structures associated with language	280
3.2 Effects of brain damage on language	86 - 87, 280
SOCIOCULTURAL CONTEXT DOMAIN	

Standard Area: Social Interactions	Chapter 13 Summary: pp. 464 - 465
1. Social cognition	434 - 439
1.1 Attributional explanations of behavior	434 - 436
1.2 The relationship between attitudes and behavior	436 - 438
1.3 Persuasive methods used to change attitudes	438 - 439
2. Social influence	435 - 436, 456 - 463
2.1 The power of the situation	446 - 451
2.2 Effects of others' presence on individuals' behavior	435 - 436
2.3 Influence of group dynamics on behavior	451 - 454
2.4 Influence of an individual on group behavior	
3. Social relations	
3.1 Nature and effects of stereotyping, prejudice, and discrimination	456 - 461
3.2 Determinants of prosocial behavior	440 - 442
3.3 Influences upon aggression and conflict	442 - 445
3.4 Factors influencing attraction and relationships	461 - 463
Standard Area: Sociocultural Diversity	Chapter 9, 11, 13 Summary: p. 324, p. 392, pp. 464 - 465
1. Social and cultural diversity	313 - 314, 455 - 458
1.1 Definition of culture and diversity	
1.2 How cultures change over time and vary within nations and internationally	
1.3 Relationship between culture and conceptions of self and identity	313 - 314
1.4 Psychological research on race and ethnicity	313 - 314, 455 - 458
1.5 Psychological research on socioeconomic status	441
1.6 Privilege and social power structures as they relate to stereotypes, prejudice, and discrimination	
2. Diversity among individuals	359 - 367, 369 - 381
2.1 Psychological research on gender identity	359 - 360, 363 - 364
2.2 Psychological research on diversity in sexual orientation	376 - 380
2.3 Gender identity and sexual orientation	381
2.4 Psychological research examining gender similarities/differences, and the impact of gender discrimination	369 - 375
2.5 Psychological research on gender and perception of roles of women and men in societies	366 - 367
2.6 Effect of perspectives on stereotypes and treatment of minority and majority groups in society	
2.7 Psychological research on differences in individual cognitive and physical abilities	
COGNITION DOMAIN	
Standard Area: Memory	Chapter 7 Summary: pp. 250 - 251

1. Encoding of memory	218 - 222
1.1 Factors that influence encoding	218 - 222
1.2 Shallow(surface) and deep (elaborate) processing	220
1.3 Strategies for improving encoding of memory	220
2. Storage of memory	230 - 233, 246
2.1 Working memory and long term memory	230
2.2 Biological processes related to how memory is stored	232 - 233
2.3 Types of memory and memory disorders (e.g., amnesias, dementias)	246, 249
2.4 Strategies for improving storage of memories	
3. Retrieval of memory	234 - 248
3.1 Retrieval cues in memory	
3.2 Role of interference in retrieval	234, 244 - 246
3.3 Factors that influence memory retrieval	235 - 237, 244 - 245
3.4 Malleability of memories	239 - 243
3.5 Strategies for improving memory retrieval	246 - 248
Standard Area: Thinking	Chapter 8 Summary: pp. 286 - 287
1. Basic elements comprising thought	254 - 261
1.1 Cognitive processes in understanding information	254 - 256
1.2 Problem solving and decision making processes	257 - 258, 260 - 261
1.3 Non-human problem solving abilities	
2. Obstacles related to thought	258 - 263
2.1 Obstacles to problem solving	258 - 259
2.2 Obstacles to decision making	261 - 263
2.3 Obstacles to making good judgments	
Standard Area: Intelligence	Chapter 8 Summary: pp. 286 - 287
1. Perspectives on intelligence	267, 273 - 277
1.1 Intelligence as a general factor	267
1.2 Alternative conceptualizations of intelligence	275 - 277
1.3 Extremes of intelligence	273 - 275
2. Assessment of intelligence	268 - 273
2.1 History of intelligence testing, including use/misuse in context of fairness	269
2.2 Current methods of assessing human abilities	269 - 271
2.3 Reliability and validity (measures and data)	268
3. Issues in intelligence	270 - 273
3.1 Consequences of intelligence testing	270 - 273
3.2 Influences of biological, cultural, and environmental factors on intelligence	
INDIVIDUAL VARIATION DOMAIN	
Standard Area: Motivation	Chapter 10, 11 Summary: p. 354, p. 392
1. Perspectives on motivation	328 - 329, 336 - 340

1.1	Biologically based theories of motivation	328 - 329
1.2	Cognitively based theories of motivation	337 - 340
1.3	Humanistic theories of motivation	336 - 337
1.4	The role of culture in human motivation	
2.	Domains of motivated behavior in humans and non-human animals	330 - 336, 376 - 385
2.1	Eating behavior	330 - 336
2.2	Sexual behavior and orientation	376 - 385
2.3	Achievement motivation	352 - 353
2.4	Other ways in which humans and non-human animals are motivated	350 - 351
Standard Area: Emotion		Chapter 10 Summary: p. 354
1.	Perspectives on emotion	341 - 346, 349 - 351
1.1	Biological and cognitive components of emotion	341 - 346
1.2	Psychological research on basic human emotions	349 - 351
1.3	Theories of emotional experience	342 - 346
2.	Emotional interpretation and expression	
2.1	Biological influence on emotional interpretation and expression	
2.2	Influence of culture and gender on emotional interpretation and expression	348 - 349
2.3	Influence of other environmental factors on emotional interpretation and expression	348 - 349
3.	Domains of emotional behavior	
3.1	Biological and environmental influences on the expression and experience of negative emotions	
3.2	Biological and environmental influences on the expression and experience of positive emotions	
Standard Area: Personality		Chapter 12 Summary: pp. 428 - 429
1.	Perspectives on personality	396 - 411, 414 - 417
1.1	Psychodynamic theories	396 - 403
1.2	Trait theories	406 - 411
1.3	Humanistic theories	403 - 405
1.4	Social-cognitive theories	414 - 417
2.	Assessment of personality	421 - 427
2.1	Personality assessment techniques	421 - 423
2.2	Reliability and validity of personality assessment techniques	421 - 427
3.	Issues in Personality	405, 415 - 427
3.1	Biological and situational influences	417 - 421
3.2	Stability and change	415 - 416
3.3	Connections to health and work	424 - 427
3.4	Self-concept	405
3.5	Individualistic and collectivistic cultural perspectives and personality	401-402
Standard Area: Psychological Disorders		Chapter 15 Summary: pp. 529 - 530
1.	Perspectives on abnormal behavior	501 - 502, 526 - 529

1.1 Psychologically abnormal behavior	500 - 501
1.2 Historical and cross-cultural views of abnormality	501 - 502
1.3 Major models of abnormality	501 - 502
1.4 Stigma and abnormal behavior	526 - 529
1.5 Impact of psychological disorders on the individual, family and society.	526 - 529
2. Categories of psychological disorders	501 - 526
2.1 Classification of psychological disorders	502 - 503
2.2 Challenges associated with diagnosis	503 - 506
2.3 Symptoms and causes of major categories of psychological disorders (including schizophrenic, mood, anxiety, and personality disorders)	501 - 502, 506 - 526
2.4 Influence of different factors on an individual's experience of psychological disorders	511 - 514
APPLICATIONS OF PSYCHOLOGICAL SCIENCE DOMAIN	
Standard Area: Treatment of Psychological Disorders	Chapter 16 Summary: p. 558
1. Perspectives on treatment	534 - 556
1.1 Change in psychological treatments over time and among cultures	
1.2 Psychological perspectives and methods of treatment	534 - 535, 539 - 545
1.3 Reasons for psychologists' use of a variety of treatment options	554 - 556
2. Categories of treatment and types of treatment providers	535 - 551
2.1 Biomedical treatments	545 - 551
2.2 Psychological treatments	539 - 545
2.3 Age appropriate treatments	552 - 553
2.4 Efficacy of treatments for particular disorders	536
2.5 Factors that improve treatment efficacy	538
2.6 Treatment providers for psychological disorders and training required for each	535
3. Legal, ethical, and professional issues in the treatment of psychological disorders	
3.1 Ethical challenges in delivery of treatment	
3.2 National and local resources for support of individuals with psychological disorders	
Standard area: Health	Chapter 17 Summary: pp. 583 - 584
1. Stress and coping	571 - 576
1.1 Stress as a psychophysiological reaction	571 - 572
1.2 Potential sources of stress	
1.3 Physiological and psychological consequences for health	572 - 573
1.4 Physiological, cognitive, and behavioral strategies to deal with stress	573 - 576

2. Behaviors and attitudes that promote health	
2.1 Ways to promote mental health and physical fitness	578 - 582
2.2 Characteristics of, and factors that promote, resilience and optimism	575 - 576
2.3 Effective and ineffective means of dealing with stressors and other health issues	567 - 582
Standard area: Vocational Applications	Chapter 1, 16 Summary: p. 22, p. 558
1. Career options	15 - 21
1.1 Careers in psychological science and practice	15 - 21
1.2 Careers related to psychology	
2. Educational requirements	535
2.1 Degree requirements for psychologists and psychology-related careers	535
2.2 Resources to help select psychology programs for further study	
3. Vocational applications of psychological science	
3.1 Ways in which psychological science addresses domestic and global issues	
3.2 Careers in psychological science that have evolved as a result of domestic and global issues
