Looking Up Illustrations ii

- #1: Northern Circumpolar Constellations ii
- #2: Ursa Major iii
- #3: M31 & Perseus iv
- #4: Summer Triangle v
- #5: Taurus vi
- #6: Orion vii
- #7: Sagittarius viii
- #8: Centaurus and Crux, The Southern Cross ix
- #9: Southern Circumpolar Constellations x

PREFACE XXIII

PREVIEW

The Cosmic Landscape 1

- The Earth, Our Home 1
- The Moon 2
- The Planets 2
- The Sun 3
- The Solar System 4
- Astronomical Sizes 5
- The Milky Way 6
- Galaxy Clusters and the Universe 7
- Forces and Matter 8
- The Still-Unknown Universe 9
- The Scientific Method 9
- Projects 13

CHAPTER 1

The Cycles of the Sky 14

- 1.1 The Celestial Sphere 16
 - Constellations 17
 - Daily Motions of the Sun and Stars 17
 - Annual Motion of the Sun 19
 - The Ecliptic and the Zodiac 20

- Extending Our Reach: Are You an Ophiuchan?* 20
- 1.2 The Seasons 21
 - Solstices, Equinoxes, and the Ecliptic's Tilt 23
 - Tracking the Sun's Changing Position 24
 - Astronomy by the Numbers: The Angle of the Sun at Noon* 25
- 1.3 The Moon 27
 - Extending Our Reach: Observing the Moon* 28
 - Astronomy by the Numbers: Estimating When the Moon Will Rise* 29
- 1.4 Eclipses 30
 - Appearance of Eclipses 30
 - Rarity of Eclipses 33
 - Precession of the Moon's Orbit 34
 - Projects 37

CHAPTER 2

The Rise of Astronomy 38

- 2.1 Early Ideas of the Heavens: Classical Astronomy 40
 - The Shape of the Earth 40
 - The Size of the Earth 41
 - Distances and Sizes of the Sun and Moon 42
 - Extending Our Reach: The Moon Illusion* 43
 - Arguments for an Earth-Centered Universe 44
 - Astronomy by the Numbers: The Diameter–Distance Relation of Astronomical Objects* 45
- 2.2 The Planets 46
 - Explaining the Motion of the Planets 48
 - Ptolemy 48
 - Islamic Astronomy 49
 - Asian Astronomy 49

- 2.3 Astronomy in the Renaissance 50
 - Nicolaus Copernicus 50
 - Astronomy by the Numbers: How Copernicus Calculated the Distances to the Planets* 51
 - Tycho Brahe 52
 - Johannes Kepler 52
 - Astronomy by the Numbers: Using Kepler's Third Law for Orbit Calculations* 54
- 2.4 The Birth of Astrophysics 55
 - Galileo Galilei 55
 - Isaac Newton 57
 - Astronomy and Astrology 57
 - New Discoveries 57
 - New Technologies 58
 - Project* 61

ESSAY 1

Backyard Astronomy 62

- Learning the Constellations 62
- Star Lore 64
- Celestial Mapping 65
- Imaging the Sky 66
- Small Telescopes 67
- Planetary Configurations 68
- Your Eyes at Night 70
- Project* 71

CHAPTER 3

Gravity and Motion 72

- 3.1 Inertia 74
- 3.2 Orbital Motion and Gravity 75
- 3.3 Newton's Second Law of Motion 77
 - Acceleration 77
 - Mass 78
- 3.4 Newton's Third Law of Motion 79
- 3.5 The Law of Gravity 80
- 3.6 Measuring an Object's Mass Using Orbital Motion 81
 - Astronomy by the Numbers: Weighing the Sun* 82
- 3.7 Surface Gravity 83
 - Astronomy by the Numbers: The Surface Gravity of the Earth and Moon* 83
- 3.8 Escape Velocity 84
 - Astronomy by the Numbers: The Escape Velocity from the Moon* 84
 - Project* 87

CHAPTER 4

Light and Atoms 88

- 4.1 Properties of Light 90
 - The Nature of Light—Waves or Particles? 90
 - Light and Color 91
 - Characterizing Electromagnetic Waves by Their Frequency 92
 - Astronomy by the Numbers: Wavelength and Frequency* 92
 - White Light 93
- 4.2 The Electromagnetic Spectrum: Beyond Visible Light 94
 - Infrared Radiation 94
 - Ultraviolet Light 95
 - Radio Waves and Microwaves 95
 - X Rays and Gamma Rays 96
 - Energy Carried by Electromagnetic Radiation 96
- 4.3 The Nature of Matter and Heat 97
 - The Kelvin Temperature Scale 97
 - Temperature and Radiation 98
 - Astronomy by the Numbers: Taking the Temperature of the Sun* 99
- 4.4 Radiation from Individual Atoms 100
 - The Chemical Elements 100
 - Electron Orbitals 101
 - The Generation of Light by Atoms 102
- 4.5 Formation of a Spectrum 103
 - How a Spectrum Is Formed 104
 - Identifying Atoms by Their Light 106
 - Types of Spectra 108
 - Astronomical Spectra 109
 - Absorption in the Atmosphere 110

- Extending Our Reach: Observing the Crab Nebula at Many Wavelengths* 111
- 4.6 The Doppler Shift: Detecting Motion 112
Projects 115

ESSAY 2

Special and General Relativity 116

- Rest Frames 116
The Speed of Light from Moving Objects 117
The Michelson-Morley Experiment 117
Einstein's Theory of Special Relativity 118
Special Relativity and Space Travel 119
The Twin Paradox 120
Rethinking Gravity 121
General Relativity 121
Astronomy by the Numbers: A Lorentz Factor of a Million 122

CHAPTER 5

Telescopes 124

- 5.1 Telescope Fundamentals 126
Light-Gathering Power 126
Astronomy by the Numbers: Light-Gathering Power of a Telescope 126
Focusing the Light 127
Extending Our Reach: Refraction 128
- 5.2 Resolving Power 131
Astronomy by the Numbers: Resolving Power of a Telescope 132
Interferometers 132
- 5.3 Detecting Light 133
Visible Light 133
Detecting Other Wavelengths 134
- 5.4 Observatories on the Ground and in Space 136
Going Observing 138
Extending Our Reach: Exploring New Wavelengths: Gamma Rays 139
- 5.5 Challenges and New Directions in Ground-Based Observing 140
Atmospheric Blurring 140

- Extending Our Reach: Distortion of the Sun's Shape* 142
Light Pollution 143
Projects 145

CHAPTER 6

The Earth 146

- 6.1 The Earth as a Planet 148
Shape and Size of the Earth 148
Composition of the Earth 149
Density of the Earth 150
Extending Our Reach: Measuring the Earth's Mass 150
Astronomy by the Numbers: Determining the Internal Composition of the Earth 151
- 6.2 The Earth's Interior 151
Probing the Interior with Earthquake Waves 151
Heating of the Earth's Core 154
- 6.3 The Age of the Earth 155
- 6.4 Motions in the Earth's Interior 156
Convection in the Earth's Interior 156
Plate Tectonics 157
- 6.5 The Earth's Magnetic Field 160
Origin of the Earth's Magnetic Field 160
Extending Our Reach: Measuring Reversals of the Earth's Magnetic Field 161
Magnetic Effects on Cosmic Particles 161
- 6.6 The Earth's Atmosphere 163
Structure of the Atmosphere 163
Composition of the Atmosphere 164
The Greenhouse Effect 164
The Ozone Layer 166
Origin of the Atmosphere 166
- 6.7 The Spin of the Earth 168
Air and Ocean Circulation: The Coriolis Effect 168
Precession 170
Projects 173

ESSAY 3**Keeping Time 174**

- The Day 174
- Hours of Daylight 176
- Time Zones 177
- Universal Time 177
- Daylight Saving Time 177
- The Week 178
- The Month and Lunar Calendars 178
- The Mayan Calendar 178
- The Common Calendar 179
- Leap Year 179
- Moon Lore 180
- The Abbreviations A.M., P.M., B.C., A.D., B.C.E., and C.E. 180

CHAPTER 7**The Moon 182**

- 7.1 The Surface of the Moon 184
 - Surface Features 184
 - Origin of Lunar Surface Features 186
 - Astronomy by the Numbers: The Limits of Telescopic Observations of the Moon* 187
- 7.2 Structure of the Moon 188
 - Crust and Interior 188
 - The Absence of a Lunar Atmosphere 189
- 7.3 Orbit and Motions of the Moon 190
 - Extending Our Reach: The Moon Landing Hoax* 190
 - The Moon's Rotation 191
 - Oddities of the Moon's Orbit 191
- 7.4 Origin and History of the Moon 192
 - Extending Our Reach: Is the Moon Completely Dead?* 193
- 7.5 Tides 194
 - Cause of Tides 194
 - Solar Tides 196
 - Tidal Braking 196
 - Projects* 199

CHAPTER 8**Survey of Solar Systems 200**

- 8.1 Components of the Solar System 202
 - The Sun 202
 - The Planets 202
 - Asteroids and Comets 203
 - The Orbits and Spins of the Planets 204
 - Astronomy by the Numbers: Bode's Rule: The Search for Order* 205
 - Composition Differences Between the Inner and Outer Planets 206
 - Age of the Solar System 208
- 8.2 Formation of Planetary Systems 209
 - Interstellar Clouds 209
 - Formation of the Solar Nebula 210
 - Condensation in the Solar Nebula 211
 - Accretion and Planetesimals 212
 - Formation of the Planets 212
 - Extending Our Reach: Direct Formation of Giant Planets* 213
 - Final Stages of Planet Formation 214
 - Formation of Satellite Systems 214
 - Formation of Atmospheres 215
 - Cleaning Up the Solar System 215
- 8.3 Other Planetary Systems 216
 - The Discovery of Planets Beyond the Solar System 216
 - Transiting Exoplanets 219
 - Extending Our Reach: Migrating Planets* 220
 - Project* 223

CHAPTER 9**The Terrestrial Planets 224**

- 9.1 Mercury 226
 - Mercury's Temperature and Atmosphere 228
 - Mercury's Interior 229
 - Mercury's Rotation 230
- 9.2 Venus 231
 - The Venusian Atmosphere 231
 - The Runaway Greenhouse Effect 232

- The Surface of Venus 232
- The Interior of Venus 235
- Rotation of Venus 235
- 9.3 Mars 236
 - The Surface of Mars 236
 - Water on Mars 239
- Extending Our Reach: Analyzing Martian Geology* 242
 - The Martian Atmosphere 243
 - The Martian Interior 245
 - The Martian Moons 245
 - Life on Mars? 246
- 9.4 Why Are the Terrestrial Planets So Different? 247
 - Role of Mass and Radius 247
 - Role of Internal Activity 248
 - Role of Sunlight 248
 - Role of Water Content 249
 - Role of Biological Processes 250

CHAPTER 10

The Outer Planets 254

- 10.1 Jupiter 256
 - Jupiter's Appearance and Physical Properties 256
 - Jupiter's Interior 256
 - Jupiter's Atmosphere 258
 - Jupiter's Rings 260
 - Jupiter's Moons 260
- 10.2 Saturn 264
 - Saturn's Appearance and Physical Properties 264
 - Saturn's Rings 264
 - Origin of Planetary Rings 266
 - The Roche Limit 267
 - Saturn's Moons 268
- 10.3 Uranus 270
 - Uranus's Structure 270
 - Uranus's Odd Tilt 271
 - Uranus's Rings and Moons 272
- 10.4 Neptune 273
 - Neptune's Structure and Atmosphere 273
 - Neptune's Rings and Moons 274

CHAPTER 11

Small Bodies Orbiting the Sun 278

- 11.1 Meteors, Meteoroids, and Meteorites 280
 - Heating of Meteoroids 280
 - Types of Meteorites 281
- 11.2 Asteroids 282
 - Size and Shape 282
 - Composition 284
 - Origin of Asteroids 284
 - Unusual Asteroids 284
- 11.3 Pluto, Plutoids, and Beyond 286
 - Pluto 286
 - Astronomy by the Numbers: Pluto's Escape Velocity* 287
 - The Plutoids 287
- 11.4 Comets 289
 - The Appearance and Structure of Comets 289
 - Formation of the Comet's Tails 290
 - Astronomy by the Numbers: Calculating Comet Halley's Orbit* 292
 - Composition of Comets 292
 - Origin of Comets 294
 - Short-Period Comets and the Kuiper Belt 295
 - Fate of Short-Period Comets 295
 - Meteor Showers 296
- 11.5 Giant Impacts 297
 - Meteor Impacts on Earth 297
 - Astronomy by the Numbers: The Energy of Impacts* 298
 - Science at Work: Ghost Craters, or No Telltale Fragments* 299
 - Mass Extinction and Asteroid/Comet Impacts 299
 - Projects* 303

CHAPTER 12

The Sun, Our Star 304

- 12.1 Size and Structure 306
 - Measuring the Sun's Properties 306
 - The Solar Interior 307

- Energy Flow in the Sun 308
- The Solar Atmosphere 308
- 12.2 How the Sun Works 310
 - Internal Balance (Hydrostatic Equilibrium) 310
 - Powering the Sun 311
 - Nuclear Fusion 312
 - The Proton–Proton Chain 312
 - Astronomy by the Numbers: The Mass Lost in Hydrogen-to-Helium Fusion* 313
- 12.3 Probing the Sun’s Core 314
 - Solar Neutrinos 314
 - Science at Work: Solving the Solar Neutrino Puzzle* 315
 - Solar Seismology 316
- 12.4 Solar Magnetic Activity 316
 - Solar Magnetic Fields 316
 - Sunspots, Prominences, and Flares 317
 - Extending Our Reach: Detecting Magnetic Fields: The Zeeman Effect* 318
 - Heating of the Chromosphere and Corona 320
 - The Solar Wind 320
- 12.5 The Solar Cycle 321
 - Cause of the Solar Cycle 321
 - Changes in the Solar Cycle 322
 - Links Between the Solar Cycle and Terrestrial Climate 323
 - Projects* 327

CHAPTER 13

Measuring the Properties of Stars 328

- 13.1 Measuring a Star’s Distance 330
 - Measuring Distance by Triangulation and Parallax 330
 - Astronomy by the Numbers: Deriving the Parallax Formula* 332
- 13.2 Measuring the Properties of Stars from Their Light 333
 - Temperature 333
 - Astronomy by the Numbers: The Surface Temperatures of Rigel and Betelgeuse* 334
- Luminosity 334
- The Inverse-Square Law and Measuring a Star’s Luminosity 334
- Radius 336
- The Stefan-Boltzmann Law 336
- Astronomy by the Numbers: Finding the Radius of the Star Sirius* 337
- Direct Measurements of Radius 338
- The Magnitude System 339
- 13.3 Spectra of Stars 340
 - Measuring a Star’s Composition 340
 - How Temperature Affects a Star’s Spectrum 341
 - Classification of Stellar Spectra 342
 - Science at Work: New Spectral Types* 343
 - Definition of the Spectral Types 343
 - Measuring a Star’s Motion 345
- 13.4 Binary Stars 346
 - Visual and Spectroscopic Binaries 347
 - Measuring Stellar Masses with Binary Stars 348
 - Astronomy by the Numbers: The Combined Mass of Alpha Centauri* 348
 - Eclipsing Binary Stars 349
- 13.5 The H-R Diagram 350
 - Constructing the H-R Diagram 350
 - Interpreting the H-R Diagram 350
 - Giants and Dwarfs 351
 - The Mass–Luminosity Relation 352
 - Luminosity Classes 353
 - Summary of Stellar Properties and the H-R Diagram 354
- 13.6 Finding a Star’s Distance by the Method of Standard Candles 355
 - Astronomy by the Numbers: Finding the Distance of a Distant Star from a Nearby Star* 355
 - Project* 359

CHAPTER 14

Stellar Evolution 360

- 14.1 Overview of Stellar Evolution 362
 - The Importance of Gravity 362

- The Life Story of the Sun—A Low-Mass Star 363
- The Life Story of a High-Mass Star 364
- Stellar Recycling 365
- 14.2 Star Formation 366
 - Interstellar Gas Clouds 366
 - Protostars 367
 - Bipolar Flows from Young Stars 368
 - Stellar Mass Limits 369
- 14.3 Main-Sequence Stars 370
 - Structure of High-Mass and Low-Mass Stars 370
 - Main-Sequence Lifetime of a Star 371

Astronomy by the Numbers: The Lifetime of the Sun 371
- 14.4 Giant Stars 372
 - Leaving the Main Sequence 372
 - Nuclear Fuels Heavier Than Hydrogen 373
 - Degeneracy in Low-Mass Stars 374
- 14.5 Yellow Giants and Pulsating Stars 374
 - Variable Stars 374
 - The Period–Luminosity Relation 376
- 14.6 Death of Stars Like the Sun 377
 - Ejection of a Low-Mass Star’s Outer Layers 377
 - The Planetary Nebula Stage 378
 - The Fates of Other Low-Mass Stars 380
- 14.7 Old Age of Massive Stars 380
 - Formation of Heavy Elements: Nucleosynthesis 380
 - Core Collapse of Massive Stars 381
 - Supernova Explosions 382
 - Supernova Remnants 383
- 14.8 History of Stellar Evolution Theories 384
 - The Development of Astrophysical Models of Stars 384
 - Testing Stellar Evolution Theory 384

Extending Our Reach: Measuring the Age of a Star Cluster 385

Project 389

CHAPTER 15

Stellar Remnants: White Dwarfs, Neutron Stars, and Black Holes 390

- 15.1 White Dwarfs 392
 - General Properties, Origin, and Fate 392
 - Structure of White Dwarfs 393
 - Degeneracy and the Chandrasekhar Limit 393
 - White Dwarfs in Binary Systems: Novas and Type Ia Supernovas 394
- 15.2 Neutron Stars 396
 - General Properties and Origin 396
 - Pulsars and the Discovery of Neutron Stars 396

Astronomy by the Numbers: Rotation Rate of a Shrunken Star 398

 - Emission from Neutron Stars 399
 - Structure of Neutron Stars 400
 - Neutron Stars in Binary Systems 400
 - X-Ray Binary Stars 401
 - Gravitational Waves from Binary Neutron Stars 402
- 15.3 Black Holes 403
 - Astronomy by the Numbers: The Schwarzschild Radius of a 1-Solar-Mass Black Hole 404*
 - The Nature of Space Around Black Holes 404
 - The Formation and Observation of Black Holes 406
 - Hawking Radiation 408

Project 411

CHAPTER 16

The Milky Way Galaxy 412

- 16.1 Overview of the Milky Way 414
 - Shape of the Milky Way 414
 - Size of the Milky Way 415
 - Structure of the Milky Way 416

- Composition and Mass of the Milky Way 418
- Age of the Milky Way 419
- 16.2 Stars of the Milky Way 420
 - Stellar Censuses 420
 - Two Stellar Populations: Population I and Population II 420
 - Star Clusters 422
- 16.3 Gas and Dust in the Milky Way 424
 - Distribution and Composition of Interstellar Matter 424
 - Interstellar Dust: Dimming and Reddening 425
 - Interstellar Gas 427
 - Cold Interstellar Gas 428
 - Extending Our Reach: Mapping the Milky Way with Radio Waves* 429
- 16.4 Motion of Stars and Gas in the Milky Way 430
- 16.5 Measuring the Milky Way 432
 - Diameter of the Milky Way 432
 - Mass of the Milky Way 432
 - Astronomy by the Numbers: Measuring the Mass of the Milky Way* 434
- 16.6 The Galactic Center 435
 - Astronomy by the Numbers: The Mass of the Milky Way's Central Black Hole* 436
- 16.7 Evolution of the Milky Way 437
 - Birth of Population I and II Stars 437
 - Evolution by Mergers 439
 - Population III 439
 - The Future of the Milky Way 440
 - Project* 443

CHAPTER 17

Galaxies 444

- 17.1 Discovering Galaxies 446
 - Early Observations of Galaxies 446
 - Types of Galaxies 447
- 17.2 The Distances of Galaxies and Hubble's Law 450
 - Galaxy Distances 450
 - Astronomy by the Numbers: Measuring the Distance of a Galaxy Using Cepheid Variables* 451
 - Astronomy by the Numbers: Measuring the Diameter of a Galaxy* 452
 - The Redshift and Hubble's Law 452
 - Limitations of Hubble's Law 454
 - Astronomy by the Numbers: Finding a Galaxy's Distance from Its Redshift* 454
- 17.3 Galaxy Interactions and Evolution 455
 - Differences in the Stellar and Gas Content of Galaxies 456
 - The Evolution of Galaxies: Collisions and Mergers 457
- 17.4 Active Galaxies 461
 - The Discovery of Nuclear Activity 461
 - Quasars 462
 - Extending Our Reach: Estimating the Diameter of Astronomical Objects by Using Their Light Variability* 463
 - A Unified Model of Active Galaxies 464
 - Science at Work: Superluminal Jets* 465
 - Probing Intergalactic Space with Quasar Absorption Lines 467
- 17.5 Galaxy Clusters 468
 - The Local Group 468
 - The Relationship of Cluster Size and Galaxy Type 469
 - Superclusters 470
- 17.6 Dark Matter 472
 - Measuring the Mass of a Galaxy 472
 - Dark Matter in Galaxy Haloes 472
 - The MACHO Hypothesis 474
 - Dark Matter in Galaxy Clusters: The Case for WIMPs 475
 - Science at Work: An Alternative to Dark Matter?* 476
 - Projects* 479

CHAPTER 18

Cosmology 480

- 18.1 Observations of the Universe 482
 - Distribution of Galaxies 482

- Motion of Galaxies 482
- Age of the Universe 483
- Astronomy by the Numbers: Estimating the Age of the Universe* 484
- Are We at the Center of the Universe? 485
- 18.2 Looking Back Toward the Beginning of Time 486
 - Olbers' Paradox 486
 - The Cosmic Horizon 487
 - The Cosmic Microwave Background 488
 - The Formation of Galaxies 489
- 18.3 The Origin of the Universe 491
 - The Origins of the Elements 492
 - The Early Universe: Radiation, Matter, and Antimatter 493
- 18.4 The Curvature of the Universe 494
- 18.5 The Inflationary Universe 496
 - Inflation 496
 - Extending Our Reach: Other Universes?* 498
 - The Flatness Problem 498
 - The Horizon Problem 499
- 18.6 Dark Energy and the Fate of the Universe 500
 - The Future Expansion of the Universe 500
 - The Density of the Universe 501
 - The Acceleration of the Universe 502
 - The Future of the Universe 504
 - Project* 507

ESSAY 4

***Life in the Universe* 508**

- Life on Earth 508
- The Unity of Living Beings 510
- Deductions from the Unity of Life and the Time Line 511
- The Origin of Life 511
- Origin of Complex Organisms 513

- Life Elsewhere in the Universe 513
- Searching for Life Elsewhere 513
- Panspermia 514
- Are We Alone? 514
- Arguments for Many Worlds 514
- Arguments That We Are Alone 516
- Radio Searches 516
- Life and the Transformation of Planets 517
- The Anthropic Principle 518

Answers to Test Yourself 520

Appendix

- Scientific Notation A1
- Metric Prefixes A1
- Solving Distance, Velocity, Time (d, V, t) Problems A1
- Some Useful Formulas A2
- Table A.1 Physical and Astronomical Constants A3
- Table A.2 Conversion Between American and Metric Units A3
- Table A.3 Physical Properties of the Planets A4
- Table A.4 Orbital Properties of the Planets A4
- Table A.5 Satellites of the Solar System A5
- Table A.6 Meteor Showers A8
- Table A.7 The Brightest Stars A9
- Table A.8 The Nearest Stars A10
- Table A.9 Properties of Main-Sequence Stars A11
- Table A.10 Known and Suspected Members of the Local Group of Galaxies A11
- Table A.11 The Brightest Galaxies Beyond the Local Group A13
