

## ACTIVITY 9-1

Name: \_\_\_\_\_ Date: \_\_\_\_\_

### Internet Audio Analysis

*Background:* It is important to understand how sound can be used effectively to enhance multimedia presentations and Web sites. When used effectively, sound enhances your presentation's message. This audio analysis will help you discover ways that audio has been used to enhance presentations and Web sites. You will then be able to apply these techniques to your multimedia presentation.

*Directions:* With your teacher's supervision, locate 10 Internet sites that include one of the following types of audio files: music, vocal narration, and sound effects. Complete the chart below by listing the site address, the company or person who created the site, the type of audio, the audio's suggested use, and your analysis of the audio's effectiveness.

	Site Address or Presentation	Creator	Type of Audio	Suggested Use	Analysis
