

ACTIVITY 9-2

Name: _____ Date: _____

Creating Sound Effects

Background: Foley artists create sound effects for radio, motion pictures, and television. The term “Foley artist” comes from Jack Foley, who pioneered the use of sound effects in motion pictures. You may wish to create sound effects of your own for your multimedia presentations. For instance, striking a large sheet of metal produces a sound like thunder.

Directions: With a partner, create six different sound effects, including thunder, footsteps, a door opening, and three sounds of your choice. Have your teacher approve your choices. You may tape the sounds on an audiocassette or digitally record them. Once you have created your sounds and recorded them on audiocassette or digitally, complete the chart below.

	Sound Effect	How the Effect Was Created
1	Thunder	
2	Footsteps	
3	Door Opening
