

## Reading Tip

Reread your summary to make sure you didn't change the author's original meaning or ideas.

### Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- 1 Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
  - Write an **A** if you **agree** with the statement.
  - Write a **D** if you **disagree** with the statement.
- 2 After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
  - If any of your answers changed, explain why.
  - Change any false statements into true statements.
  - Use your revised statements as a study guide.

Before You Read A or D	Statement	After You Read A or D
	<b>1</b> Earth's revolution around the Sun causes day and night to occur.	
	<b>2</b> Earth's magnetic poles are aligned on Earth's rotational axis.	
	<b>3</b> Summer occurs in the northern hemisphere when Earth is closest to the Sun.	
	<b>4</b> During an equinox, the number of daylight hours is nearly equal with the number of nighttime hours all over the world.	
	<b>5</b> When observing the phases of the Moon, the Moon's lighted surface area is daylight on the Moon and the dark portion is nighttime on the Moon.	
	<b>6</b> The length of one Moon day is about the same amount of time as the length of one Earth day.	
	<b>7</b> A lunar eclipse occurs when the Moon comes between Earth and the Sun.	
	<b>8</b> Humans first walked on the Moon during the <i>Apollo</i> spacecraft missions.
