Target Your Reading

Use this to focus on the main ideas as you read the chapter.

Before you read the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.

- Write an A if you agree with the statement.
- Write a **D** if you **disagree** with the statement.

Graphic organizers such as the Cause-Effect organizer help you organize what you are reading so you can remember it later.

Read

2 After you read the chapter, look back to this page to see if you've changed your mind about any of the statements.

- If any of your answers changed, explain why.
- Change any false statements into true statements.
- Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	Opposite poles of magnets attract each other.	
	2	An electric motor converts electrical energy into kinetic energy.	
	3	Earth's magnetic field has not changed since the Earth formed.	
	4	Magnetic fields get stronger as you move away from the magnet's poles.	
	5	A wire carrying electric current is surrounded by a magnetic field.	
	6	An electromagnet is wire wrapped around a magnet.	
	7	Magnetic fields have no effect on moving electric charges.	
	8	Earth's magnetic field affects only Earth's surface .	
	9	Magnetic fields are produced by moving masses.	
	10	Transformers convert kinetic energy to electrical energy.
