

## Academic Activity Chapter 1

# Engineered Items

An engineer has a hand in nearly everything you come in contact with, whether you live in a large urban area, a suburb, or a rural area. In fact, very few things we come in contact with have not involved some form of engineering.

- 1. List three things that you came in contact with today that were engineered.**

---

---

---

- 2. What do they all have in common?**

---

---

---

- 3. In a single day the average person uses items from every branch of engineering. List five items for each branch of engineering.**

- a. Civil Engineering**

---

---

---

- b. Mechanical Engineering**

---

---

---
