

Virtual Lab Activity 8.2

Nuclear Power Generation

- 1. Observe** Watch the Nuclear Power Generation animation. Research nuclear power. Give a brief description of how an electrical engineer could design and use nuclear power generators to create electricity for a large city (50,000+ people).

- 2. Execute** Research the personnel needed to staff a nuclear power plant and the physical characteristics of a plant. List essential personnel in a nuclear power plant, and make five sketches of a nuclear power plant's facilities.
