

- Observe Watch the design constraints and criteria animation. Record the design constraints and criteria. Explain detailed definitions and examples for each of the design constraints and criteria.
- 2. **Execute** Explain how you would consider design constraints and criteria when creating a solution to a basic problem in your life, such as how to fix something. Sketch an ergonomic design for a basic cooking utensil. List all of the design constraints and criteria you would need to consider while researching and designing this item.
