

Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- **Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
 - Write an A if you agree with the statement.
 - Write a **D** if you **disagree** with the statement.
- **After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
 - If any of your answers changed, explain why.
 - Change any false statements into true statements.
 - Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	Only objects that are moving have energy.	
	2	Energy of motion depends only on the object's mass and speed.	
	3	The amount of thermal energy an object has depends on its temperature.	
	4	Energy changes from one form to another when a ball is thrown upward.	
	5	Living organisms change chemical energy to thermal energy.	
	6	The total amount of energy increases when a candle burns.	
	7	Coal is being made faster than it is being used.	
	8	Solar energy is the least expensive energy source.	
	9	A heat pump can heat and cool a building.	

Read one or two paragraphs
first and take notes after you
read. You are likely to take
down too much information
if you take notes as you read.
