**Unit 4**  
**The Child from One to Three**

**Developing Community Involvement**

**Learning About Children**

There are many things to learn about the physical, emotional, social, and intellectual development of children. Contact a child care facility and ask about volunteer opportunities. You may want to volunteer an hour or two a week to learn more about working with young children. The skills you learn will be helpful now if you babysit or in the future if you have children of your own.

1. List the skills you learned during your volunteer work at a child care center.
